
Hello Neighbors…

Tree Work & Other Updates

Tree Work Begins Monday

You may have already heard that tree work will begin on Monday, August 17. Bianco Tree Services will be on site removing problem trees and trimming branches away from roofs, chimneys, and the sides of homes. Trees were put on the work list in response to homeowner requests and to observations by the Landscape Committee.

The trees to be removed have been marked with orange ribbon. Bianco will be cutting them down piece by piece to keep the work safe. Their crew will be chipping the pieces, so you can expect noise during the work day.

The crew will be knocking on doors of the closest homes before starting work. This will let you move your car away from the work area in case you need to somewhere during the day.

This work is being done to protect people and to prevent damage to buildings. If you want a tree removed because you think it is ugly, put in a Landscape Change Request. The Landscape Committee will review the request and make a recommendation to the Board of Directors.

Rock Monument

As long as Crosswoods has been here, there has been a rock monument at the entrance off Auburn Boulevard honoring John Francis Cross who came to California in 1854 and later owned the land where we now live. About ten years ago, the monument was knocked over by a truck. This year a group of Crosswoods volunteers turned the monument over, revealing the bronze plaques honoring John Cross.

We have arranged with the City of Citrus Heights to move the monument into Crosswoods where it can be seen by pedestrians. It will go next to the HOA bulletin board on Crosswoods Circle near the office path. Look for a cone marking the spot where the monument will go. Before the rock can be moved, Underground Service Alert will check the area to make sure the monument will not damage any underground utilities.

We expect that John Francis Cross's monument will arrive at its new location in a month or two.

Traffic Lights at San Tomas

The City of Citrus Heights will be changing the controls for the traffic lights on Auburn Boulevard at San Tomas. The sensors for the controls are located in the pavement. They can be damaged by potholes or repaving. Now they are preventing the resurfacing of San Tomas.

The City will be installing cameras to replace the sensors in the pavement. So expect to see work in the next few months at the intersection of San Tomas and Auburn Boulevard.

Norm Hill

Secretary, Crosswoods HOA
